Fax: (775) 323-3652

Welcome and Thank You for choosing us to provide your eye health and vision care. To establish your file, and provide the best use of your time, the doctor has asked you to complete the following tasks and bring the results to your appointment. The doctor needs this in order to give you the best care possible.

Complete Welcome to the Office Form: This diagnostic information included personal and family information needed to establish your file, as well as your current eye health and vision status. Your responses will guide our doctors and staff, and remind us to address any significant issues during your visit.

Complete Medical and Eye Health History: Many general health conditions are associated with visual symptoms and/or eye health problems. This important record (required by the Board of Optometry and virtually all insurance plans) will allow us to care for you as a “whole person” rather than just a pair of eyes. This form includes a complete list of prescription and non-prescription medication, which may be brought in as a separate list for us to photocopy if you prefer.

ID card and Insurance cards or claim forms: Please bring your picture ID as well as any Insurance cards or claim forms for any optical and/or medical insurance you may be covered by. (Even for “routine” visits, if a medical eye condition is discovered during your examination we can submit a claim to your health insurance for the medical evaluation portion of your examination).

Eyeglasses: Please bring ALL pairs of eyeglasses you currently use, including prescription or non-prescription reading glasses, sunglasses, etc. We will compare the optical power of your old lenses with your new exam findings, thus enabling us to determine and explain how your vision has changed over time. We can also evaluate the condition and fit of your current eyewear.

Contact Lenses: It is best to wear your current contacts to your appointment. Next best is to bring them along in your case. If you wear planned replacement or disposable lenses, it is very helpful if you bring along cartons or lens packets that indicate the lens series, power, manufacture, etc.

Eye drops, ointments, etc: Please place any eye drops or ointments (non-prescription or prescription) that you use (even if just occasionally) in a small bag and bring it along with you. Your doctor will review whether these are still appropriate, and whether there may be better options that are now available.

Children: Please bring any referral forms if a problem was found at school or Head Start screening, etc. This will help us to confirm or rule out the suspected problem most efficiently.

Dilation Explained: The doctor may need to use drops to dilate your eyes to fully evaluate their internal health. This has the effect of temporarily increasing sensitivity to light and cause “fuzzy” vision at a near (reading) distance. Therefore, if you want new eyewear or feel you may need to select new eyewear, please come 15 to 20 minutes before your appointment time in order to look at our frame selection.

Please Note A 24hr. Notice is required on all canceled or rescheduled appointments. A parent or legal guardian must accompany all minors.
